

Prescribed Burn Association Interest Meeting

Montgomery County and Surrounding Areas

Prescribed fire or controlled burning is an affordable and effective management tool to accomplish land management goals including reducing fuel loads to reduce the intensity and chance of wildfire, restoring native plant communities, enhancing wildlife habitat, improving livestock forage production, regenerating merchantable trees, and controlling invasive species. The responsible use of fire can benefit the people and resources of Illinois.

Prescribed Burn Associations are a community and landowner-based approach to using prescribed fire to restore our landscapes through cost-share and cooperative burn agreements amongst landowners and local organizations, provide greater access to equipment and resources.
